Introduction

We are ammunition manufacturers PPU, located in the city of Užice in southwestern Serbia. We have been manufacturing ammunition for 89 years, beginning in 1928. PPU supplies ammunition to armed forces and law enforcement throughout the world.

We also manufacture sporting and hunting ammunition which is sold worldwide.

The quality of our ammunition is always our priority and to that end we utilize only the most modern equipment and machinery. Through research and innovation we have developed a wide assortment of ammunition. Thanks to rigorous quality control and precise workmanship we deliver highly reliable ammunition with high performance characteristics.

THE HISTORY OF THE FACTORY

Our history begins in 1928 when the first plant was opened under the name “Ammunition Factory of Užice” (FOMU).

In the beginning, the factory manufactured numerous, now obsolete calibers, including Central 7mm, Serbian Nagant 7.62mm, Montenegrin Nagant 11.2mm, Russian Nagant 7.62mm, Velodog 5.6mm and special hunting cases for smokeless powder. During this period the factory manufactured single and double barrel shotguns in 12, 16 and 20 gauges. In subsequent years manufacturing began with producing 7.9mm military rifles and ammunition for 9mm government handgun.

The factory had been severely damaged several times during WW2, but was always rebuilt and continued functioning. In that period the factory got a new name – Prvi Partizan and became government owned.

During the 1970s new facilities were built which enabled increased output and the introduction of new products.

A brand new facility was completed in 2013 and we now utilize the most modern technologies and equipment in accordance with the highest standards.

Quality Standards

Our manufacturing philosophy is based on high standards. In order to ensure the highest quality of our products, we have established a quality control system in accordance with the internationally recognized ISO 9001:2008 and SORS 9000/05 standards.

Maintaining high quality is the most important factor of our success. We achieve this by the consistent implementation of QMS management systems in all phases, from the recognition of customer requests, planning, supply of raw materials, manufacturing, quality control to the final delivery of our products and the satisfaction of our customers.

PPU Today

Throughout our history we have continuously widened our assortment and successfully kept up with trends and technology, always keeping in mind the needs of our increasing number of customers. Thanks to continuous innovations and timely transformation whenever it was necessary, we have established ourselves as a modern company with a high reputation.

We offer a wide assortment of products:

- **SPORTING AND HUNTING AMMUNITION**
- **BLANK AMMUNITION**
- **MILITARY AMMUNITION**
- **MACHINES AND TOOLS FOR MANUFACTURING OF AMMUNITION**
- **ETC**

We manufacture more than 160 types of rifle and handgun ammunition.

SUBSONIC LINE

NEW

2017 NEW
PRODUCTS

SUBSONIC LINE AMMUNITION

With the recent popularity of subsonic ammunition we are proud to present our PPU Subsonic Line. The new Subsonic Line ammunition is manufactured to strict quality production standards and will exceed all expectations. Subsonic ammunition has been in use by military, law enforcement, and training because of its lower noise and lower recoil benefits. Give it a try yourself and experience the benefits firsthand and see why subsonic ammunition is gaining popularity with shooters.

Some calibers are available in different packaging:

1 NATO Standard M2A1 Metal case

2 PVC battle packs, airtight and waterproof for long-term storage

THUNDER AMMUNITION

Thunder ammunition is performance driven hunting ammunition that is both efficient and effective in fulfilling your hunting season needs. The balance of energy with lightning speed velocity and bullets designed to hit hard and evenly mushroom out while maintaining bullet weight coefficients are the highlights of this line. Thunder ammunition delivers performance and your favorite game on your dinner table.

MATCH AMMUNITION

PPU Match line ammunition is designed for precise shooting at both short and long ranges. The exceptional accuracy of PPU Match ammunition is the result of special production and control processes which demand holding very narrow tolerances. We use reliable primers of extreme consistency and carefully chosen powders for loading, ensuring uniform ballistics. Our rigorous final testing and inspection ensure that customers get only the best ammunition which completely fulfills their expectations.

HANDGUN

PPU handgun ammunition is available in many popular calibers for pistols and revolver style handguns. Our handgun ammunition is brass cased, non-corrosive boxer primed and features our improved bullet designs which result in greater energy performance, bullet expansion and reliability.

BLANK AMMUNITION

PPU manufactures many calibers of brass cased blank cartridges. Most are “full cased” types, i.e. they have an extended case shaped similar to a loaded round. This provides reliable functioning in all types of weapons. Please note that correct blank firing adapters must be used on the gun to ensure semi or full automatic operation.

SP RIFLE BULLETS

We offer a comprehensive line of centerfire rifle and handgun ammunition components. These continue our commitment to high quality and excellent performance.

1 SP *Soft Point Rifle Bullets*

Soft Point Rifle Bullets are standard bullets designed to provide controlled expansion when penetrating. This is accomplished by soft lead exposed in the nose that initiates expansion and by a progressively tapered jacket in its ogive. SP Rifle Bullets provide uniform mushrooming and good penetration.

2 PSP *Pointed Soft Point Rifle Bullets*

Pointed Soft Point Rifle Bullets have a sharp lead nose which causes bullet expansion upon impact and an aerodynamically shaped ogive which provides better ballistic coefficients and maximum striking energy at long range.

3 SP BT *Soft Point Boat Tail and Pointed Soft Point Boat Tail Rifle Bullets*

Soft Point Boat Tail and Pointed Soft Point Boat Tail Rifle Bullets have boat tails which lower air drag. The better ballistic coefficient of these bullets allows successful shooting at longer distances. The bullet maintains striking energy with reduced wind drift and flatter trajectory.

SOFT POINT RIFLE BULLETS

4 SP RN Soft Point Round Nose Rifle Bullets

Soft Point Round Nose Rifle Bullets have a blunt rounded nose and are suitable for short range shooting especially in the brush of dense forests. The large lead weight exposed in the nose assures high energy impact and bullet mushrooming even at lower velocities.

5 FSP Flat Soft Point Rifle Bullets

Flat Soft Point Rifle Bullets have a flat soft point suitable for magazine loading. They expand reliably and penetrate deeply on light to medium game.

6 HSP Hollow Soft Point Rifle Bullets

Hollow Soft Point Rifle Bullets have a cavity in the nose which causes expansion and helps mushrooming during penetration.

Full Metal Jacket Round Nose Rifle Bullets

Full Metal Jacket Round Nose Rifle Bullets are specially shaped and designed to reduce air resistance.

FMJ BT

3

Full Metal Jacket Boat Tail Rifle Bullets

Full Metal Jacket Boat Tail Rifle Bullets have a higher ballistic coefficient due to their boat tail design. The bullets are designed to provide flat trajectories and reduced wind drift.

HOLLOW POINT RIFLE BULLETS

Hollow Point Rifle Bullets are designed primarily for shooting competitions. Due to the cavity in the nose, the center of gravity is placed back which improves flight stability and accuracy.

Hollow Point BT Rifle Bullets have a higher ballistic coefficient due to their long ogive and boat tail design. These features enable very accurate long range shooting with flat trajectories and reduced wind drift.

BRASS

**PPU Reloading Brass –
Synonymous with Accuracy!**

PPU has been manufacturing brass components since 1928 and have a worldwide reputation for quality. Using only the best raw materials coupled with today's modern manufacturing procedures, heat treatment processes and stringent quality assurance inspections throughout the production process, PPU creates high quality Reloading Brass Case components that can only help to define shooting "**Accuracy**".

EXPANDING HANDGUN BULLETS

1 JHP *Jacketed Hollow Point Handgun Bullets*

Jacketed Hollow Point Handgun Bullets have a full-length jacket with a hollow point. This construction provides deep penetration with controlled expansion. JHP bullets offer reliable feeding into the chamber and good functioning in auto loading handguns.

2 SJHP *Semi Jacketed Hollow Point Handgun Bullets*

Semi Jacketed Hollow Point Handgun Bullets provide optimum expansion with controlled penetration.

3 SJFP *Semi Jacketed Flat Point Handgun Bullets*

Semi Jacketed Flat Point Handgun Bullets are suitable for short range shooting with revolvers. They provide deeper penetration with less expansion than SJHP.

1 FMJ Full Metal Jacket Handgun Bullets

Full Metal Jacket Handgun Bullets are general purpose bullets suitable for target and training shooting.

2 FPJ Flat Point Jacket Handgun Bullets

Flat Point Jacket Handgun Bullets are FMJ bullets with a flat nose. These bullets are designed to improve the stopping power of the FMJ bullet.

3 FMS Full Metal Spitzer Handgun Bullets

Full Metal Spitzer Handgun Bullets have a conical nose and are designed to minimize air resistance and retain more kinetic energy.

4 TMJ Metal Jacket Handgun Bullets

TMJ Total Metal Jacket Handgun Bullets are designed for use in indoor shooting ranges.

1 **RLN** *Round Lead Nose Bullets*

Round Lead Nose Bullets are versatile bullets for general purpose used mainly in revolvers. They are very accurate and suitable for practice shooting.

2 **WC** *Wadcutter Bullets*

Wadcutter Bullets are specially designed lead bullets with excellent accuracy. These cylindrical bullets cut clean holes in the paper target.

3 **SWC** *Semi-Wadcutter Bullets*

Semi-Wadcutter Bullets have higher velocity and power. They provide accurate shooting at longer distances.

4 **SWC HP** *Semi-Wadcutter Hollow Point Bullets*

Semi-Wadcutter Hollow Point Bullets with a nose cavity deliver immediate expansion and accurate shooting.

HANDGUN BRASS

PPU brass components are best described by the word “**Accuracy**” which is the degree to which the result of a measurement, calculation or specification conforms to the correct value or a standard. As a result of our tradition of strict compliance to higher standards required by sportsmen and government security/military forces, PPU Reloading Brass Cases are the most important basic component that unifies the rest of the components together in order to create the most accurate handgun cartridge.
